Convert Your Home Into A Solar Powered
Home To Save You Money And Contribute
To A Healthier Environment”**

Dear friend,

Do you want to design, install or build your very own solar powered home, but don't know how or where to start? Do you wish that there was a way for you to convert your existing home into a hybrid solar system without having to pay thousands of dollars for someone else to do it for you?

Or are you a professional contractor, builder, or construction worker who wants to familiarize yourself with designing and installing a solar powered system so that you can offer this service to potential clients?

Or are you tired of spending hundreds of dollars each month for electricity and need an alternative that saves you money and makes you less dependant upon your local utilities?

Well, if you answered yes to any of these questions, then I have good news for you, because in just minutes from now, you're going to learn about a sure-proofed guide that takes you step-by-step and empowers you with the knowledge, skill, and ability to build or convert to solar power.

I'll tell you ore about that in a minute, but first, let me introduce myself.

Hi, my name is XXX, a solar power expert and home builder, who has helped professional contractors, builders, and ordinary people just like you convert to solar powered homes.

Believe me, I know exactly how you feel, because I've been where you are right now. You're tired of your hard earned money being sucked away to energy costs. You're tired of depending on your local utility company for electricity, when there is an alternative that you can use, provided by our natural environment. And you're ready to start providing energy for yourself and your family in a smarter, cost-effective, and environmentally safe way.

Years ago, I was in the same boat, but with this new, revolutionary guide that your about to learn about, I learned how to build my very own hybrid solar system on my own, transforming my home into a solar powered home, where I was able to:

- Instantly cut energy costs by 50%
- Be less dependent on local utilities
- Contribute to having a healthier environment
- Gain valuable information to learn how to achieve solar power goals

I was able to do all of that and more with this unique guide and after TODAY, you'll be able to do it too!

But first, here's....

Why Investing In Solar Energy Is A Good Idea

A solar power system will allow you to free yourself from the utility company and the instability of global energy markets. Installing a solar power system is equivalent to prepaying for 40 years of power at a fraction of the cost you're currently paying now.

The cost/unit of energy you pay now is higher than what you would pay with solar. As rates increase in the future, this difference will also increase, leading to even more savings over the life of the solar energy system in your home.

And if this is what you want for yourself, then.....

Building A Solar Powered Home Will Be A Breeze For You

Whether you're a professional home builder, contractor, construction worker, or an ordinary person, who enjoys doing home repairs and projects, with this of-of-a-kind guide that I've been telling you about, you'll quickly learn how to design and build your very own solar powered home from start to finish and start enjoying the cost-saving advantages that having a hybrid solar system provides you with.

And it doesn't matter what your skill level is when it comes to building. With this powerful guide, you'll:

- Conserve energy
- Reduce local air pollution
- Improve your indoor air quality
- Offset greenhouse gases
- Reduce the need for dry-cell battery disposal

You'll be able to do all of that and more once you say yes to the.....

Solar Product Name

The Solar Product Name is a step-by-step and easy to use guide that takes complicated technical jargon and simplifies it into simple language that everyday people like you and me can understand, making it a breeze for you to build or convert your home into a solar powered home.
